

CATRINA Token — Litepaper

A Cultural Tribute to Día de Muertos and José Guadalupe Posada

1. Vision & Philosophy

CATRINA is not just a token — it's a cultural experiment, a bridge between tradition and Web3. Conceived as a tribute to Posada and Día de Muertos, it invites artists, historians, and communities to collaborate. - We reject speculation as the core — instead, we center memory, art, community, and storytelling. - Every Día de Muertos period, CATRINA activates cultural faucets and curated airdrops to reward participation. - Over time, the project may evolve into grants, microfunds, artist residencies, on-chain story archives, or DAO-led cultural projects.

2. Tokenomics & Security

- Mint: Immutable (mint authority revoked) — No further tokens can ever be created
- Freeze authority: Revoked — No account can ever be frozen
- Total supply: Fixed (preminted)
- Utility: Faucet, airdrops, cultural rewards
- Liquidity pairing: CATRINA / USDC pool

Why this matters: - Supply is cryptographically capped — no rug pull is possible. - No holder's balance can be frozen. - Transparency: all distributions and movements are on-chain and auditable.

3. Site / App Mechanics

Homepage & App mechanics: - Token: Nonmintable, Nonfreezable, Fixed Supply - Seasonal faucet window before Día de Muertos - App features: faucet requests, image submissions, dashboard (future) - Rooted in participation, cultural expression, and accountability.

4. Launch & Liquidity

- Token live on Solana mainnet, metadata at catrina.club
- Liquidity pool (CATRINA / USDC) seeded, price visible in Jupiter
- Wallets/aggregators may take time to sync logo/metadata
- Next step: register with Jupiter Verify / token list.

5. Utility & Participation

- Faucet: limited-time faucet with per-wallet cap
- Cultural Airdrops: submissions of art/texts rewarded

Potential future expansions: Nonprofit grants, NFTs ofrendas, memory archives, DAO governance

6. Roadmap

Q4 2025: Launch, brand kit, artist call, first poll Q1 2026: Art drops, microgrants, NFT releases Q2 2026+: On-chain records, cultural DAO tooling

7. Trust & Transparency

- All interactions visible on Solana explorers
- Future dashboard to show uploads & airdrops
- Minting and freeze revoked
- Community-driven oversight and audits possible
